África Position in SDGs

- Average Economic growth is below 7% per annum
- Social inclusion struggles include:
 - 2nd most unequal region in the world
 - Education –enrolment good but slow in completion
 - Healthcare –Maternal mortality higher global average

Statistics

- Only 40% of the SDG's indicators have data
- Only 50% of African countries have comparable surveys over last two decades
- Both indicators and methodology framework remain incomplete
- 22% of African nations have independent statistics offices
- We have the **Tanzania Bureau of statistics (TBS)**

Statistics...

• Status.....

Africa partly on track on Gender Equality, Climate and life on land.

No data for SDGs 10, 11 and 12

Social inclusion progress outstripped by population growth (Over 33 million babies every year)

Poverty and inequality remain widely prevalent.

280 million malnourished
63 million children stunted

Forecasts SDGs (1,2,3,4, 5,6 and 7)

→ North Africa likely to meet all

→ Central Africa unlikely to meet all.

→ The other regions modestly on track on enrolment, child mortality, and access to drinking water

SL- Entry Point

- **Universities can do the following:-**
 - Advocate for the SDG's by raising awareness to Citizens and policy lobbying from government.
 - Conducting research on SDG issues i.e Climate, Human rights, Education
 - Partnering with local communities to address SDG challenges
 - Providing student scholarships and internships that support SDG work
 - Integrate the SDG's into their curriculum by developing courses that focus on the SDG's

STRUCTURAL CONSTRAINTS TO SDGS

Many...

Take-away Message

• Actions

Africa is way
off track

Current
efforts
necessary but
not sufficient

Weakness
across the
entire SDG
ecosystem for
continent

There is an
urgent need
to
compensate
for lost time

Seminario Internacional de
Aprendizaje y Servicio Solidario

A way forward

We aspire to leave no One behind!

Africa

Rest of
World

SDG
targets
